

Primiano Di Nauta is a full professor of business organization at the University of Foggia (Italy), Department of Economics. He is a member of the faculty board of the PhD “Management, Banking and Commodity Sciences” at Sapienza University of Rome, vice president of the Association for Research on Viable Systems, member of the board of directors of the Italian Association of Sustainability Science.

His **academic backgrounds** include a degree in civil engineering, a master of business administration, research in organizational and management issues in complexity, sustainability and service science.

In **his professional work**, consulting to private and public companies, he is committed to the aim of reducing the gap between the organization and management issues and their application in real organizational contexts.

In **his research work** he is focused on organization and management theories, decision making in complex contexts, management of innovation and technology transfer, ICT adoption and impact in organizations, project management and project based organizations.

He is passionately involved in activities of the Project Management Institute – Southern Italy Chapter, and as a member of the Research Committee.

He is an author and editor of multiple professional and research publications, among them:

- (2018). Reflections on the Role of University to Face the Challenges of Knowledge Society for the Local Economic Development. *Journal of the Knowledge Economy*, DOI: 10.1007/s13132-015-0333-9
- (2017). Real and Apparent Changes of Organizational Processes in the Era of Big Data Analytics. *Studi Organizzativi*, DOI: 10.3280/SO2017-002005
- (2012). Viable service systems and decision making in service management. *Journal of Service Management*, DOI: 10.1108/09564231211260396
