

Angela Espinosa is a Computer and Systems Engineer, Doctor on Cybernetics, and a Reader in Cybernetics at the Business School, University of Hull, England, UK. She was born in Colombia, where she worked as the Director of the Secretariat of Information and Systems of the Colombian President's Office in the early 1990s. Then she has taught systems and cybernetics in several universities in Colombia (1993-2001; 2009-2019); and in Hull University in the UK (2002-2019). She has contributed to the Centre of Systems Studies from Hull University Business School, and she has been a cybernetic consultant for both private and public organisations in Latin America, Europe and the Middle East.

She has published extensively books and papers in operational research, systems, cybernetics, complexity and sustainability journals.

Research Interests: organizational cybernetics, viability and sustainability in businesses, communities, networks and society.
