

Sandro Luis Schlindwein is a professor at the Federal University of Santa Catarina, Department of Rural Engineering, Brazil. He was founding coordinator of the Postgraduate Programme on Agroecosystems, and from 2003 to 2004 he was a Visiting Research Fellow of the former Systems Department at the Open University, UK. He has been also a Visiting Scientist at the Leibniz Centre for Agricultural Landscape Research (ZALF), Germany.

In **research**, his current interests are to address from a cyber-systemic perspective wicked problematic situations like the dynamics of land use change in social-ecological systems, and the development of adaptation strategies to climate change. He also has been engaged in the development of indicators of sustainability as learning systems for sustainability. From 2008 to 2012 he was a work package leader of a major research project (CLARIS LPB) funded under the EU Seventh Framework

Programme to predict climate change impacts and to develop adaptation strategies in La Plata Basin, South America.

He is member of the Board of Directors of WOSC, and an Associate Editor of *Kybernetes*. In 2007 he organized and was President of the Third Brazilian Systems Congress.

More about him and a full list of publications can be found at <http://lattes.cnpq.br/8254788616197493>
